Quick Guide

Creating an LRA-Officer profile (CMC)

Status: released

V2.0

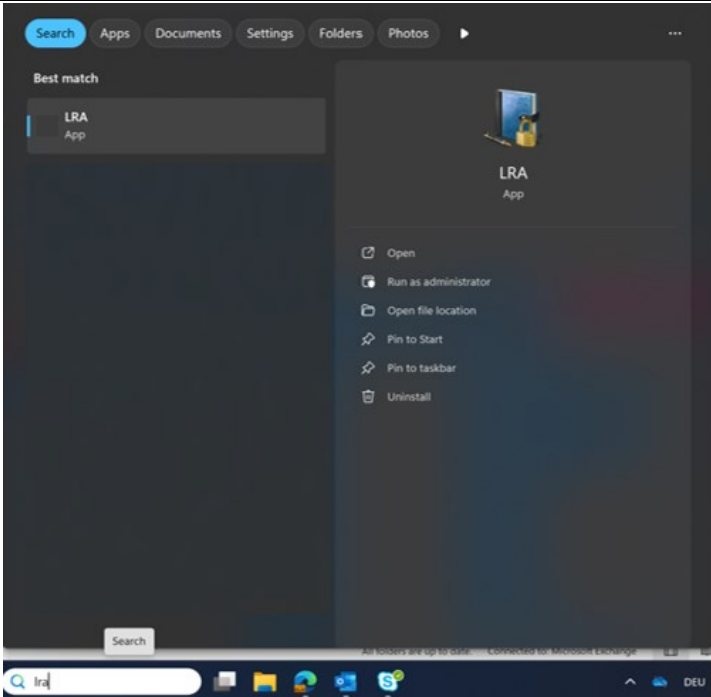

The LRA application, also known as the Certificate Management Console (CMC), is only available on the BAB client under Swiss Government PKI – Officer Tools. Among other things, the application can be used to issue and revoke certificate classes A, B, C Standard and C Customised

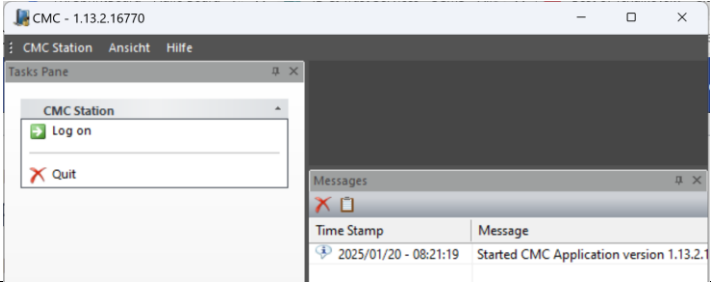

An LRAO officer profile must be created before the application can be used, which is what this quick guide refers to. You can find further quick guides for the CMC application on our [PKI homepage](#).

1. Create profile

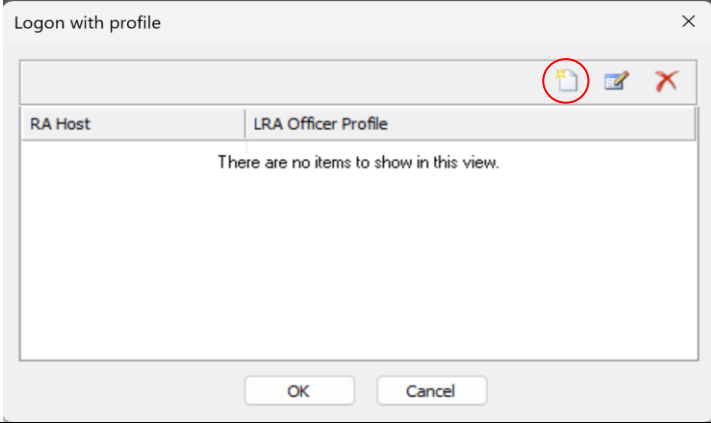

Start the LRA application.

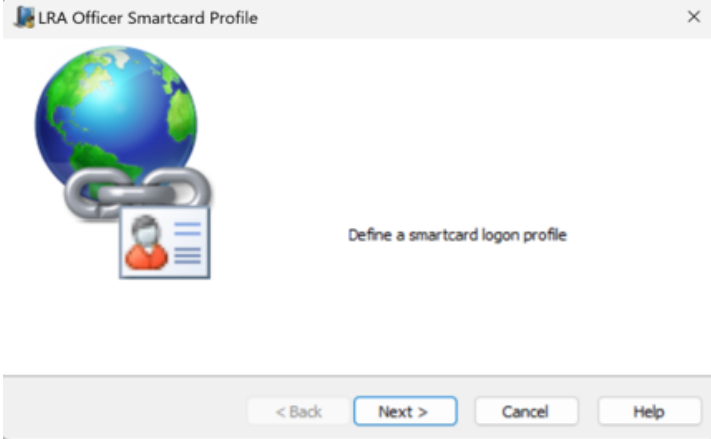

After starting the application, click on “Log on”.

Click on the circled icon to add a new profile.

Click on “Next”.

Enter a profile name in the text field: for example, your common name (CN) consisting of last name, first name and suffix.

Then click on "Next".

Name

Profile Name
LRA Officer Connection Profile

Profile name: Muster Hans gXI683

< Back Next > Cancel Help

Enter the RA Host URL in the text field (<https://ra.pki.admin.ch/RA>) and click "Next".

RA Host

RA Host Name
The remote host name to connect to.

RA Host: https://ra.pki.admin.ch/RA

< Back Next > Cancel Help

Select the "SafeNet smartcard" option from the drop-down menu.

Wait until the view is updated and your smartcard is displayed in the table.

Smartcard

Select a smartcard
The smartcard contains an LRA Officer certificate

Smartcard: [Gemalto smartcard / SafeNet smartcard]

Serial #	Label	Model
There are no items to show in this view.		

< Back Next > Cancel Help

Select the line with your card and then click on "Next".

Karte

Select a smartcard
The smartcard contains an LRA Officer certificate

Smartcard: SafeNet smartcard

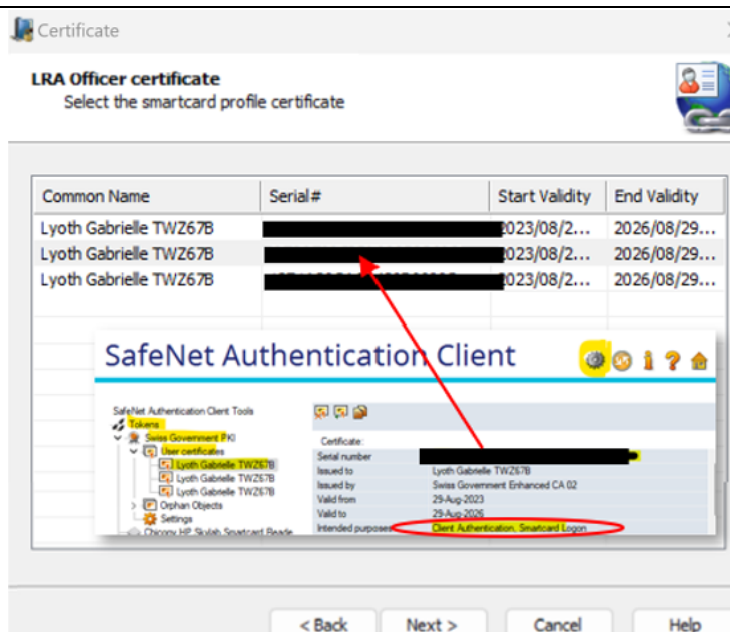

Serial #	Label	Model
	Swiss Government PKI	ID Prime MD

< Back Next > Cancel Help

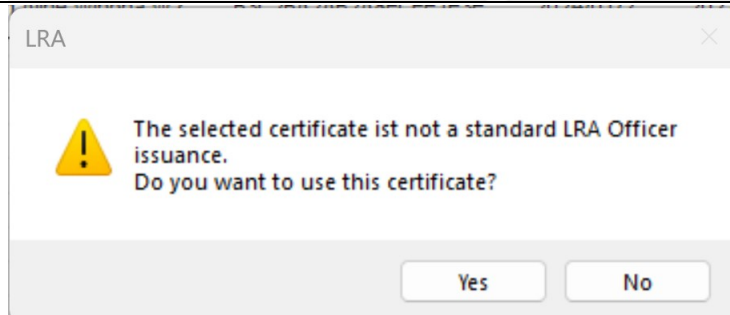

Select the certificate with the purpose **Client Authentication** in the table.

You can use the *SafeNet Authentication Client* application to find out which certificate is the correct one.

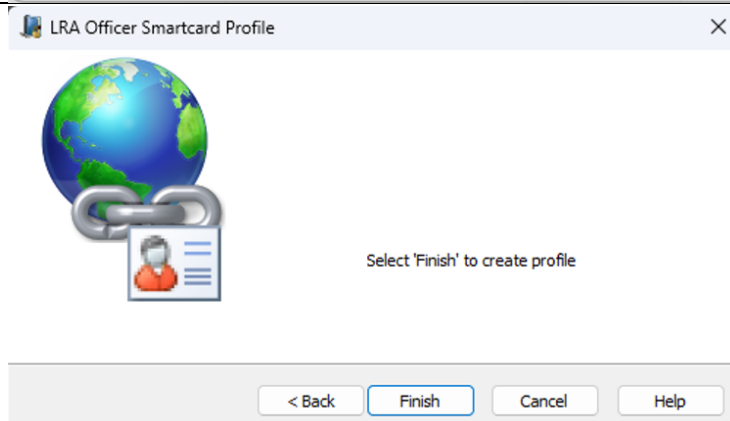

Then click the "Next" button.

Confirm the dialog with «Yes».

Click on the «Finish» button to save the profile.

Your profile is now saved on the LRA application and can be selected directly when you log in again.
